FREE & OPEN SOURCE

Jebadiah

A probability. For every answer.

Jeb is a family of open decision models. Ask a question with fixed answers and get a probability for each one, instead of a paragraph of text. Built for routing, triage, and allow-or-block calls inside software.

01 4B, 9B, and 27B
Run the size that fits, from a laptop to a DGX Spark.

02 Calibrated, not chatty
Every option gets a probability you can threshold.

03 Open weights
Apache-2.0, trained on public data, ranked on the open Decision Index board.

WHO IT'S FOR
Developers who need fast, private, calibrated decisions inside their apps and agents.

PRICING
Free
Open weights (Apache-2.0)
