FREE & OPEN SOURCE

MySafeSite

Is your website safe this week?

A free website safety check graded A to F in about 20 seconds. It tells you if your site is exposed to the critical PHP flaw, which host it's on, and whether basic protections are missing.

01 Graded A to F

A clear answer in about 20 seconds.

02 Current threats

Checks for this week's known exposures.

03 Plain language

What's wrong and what to fix first.

WHO IT'S FOR

Small business owners without a security team.
