Pagiie

Build the web. Skip the stack.

An open-source desktop studio for building and publishing static websites by talking to it. Shape the site on a live canvas, and choose the AI that powers it.

01 Talk to it
Describe changes and watch them on the canvas.

02 Static by default
Fast, portable sites with no plugins to patch.

03 Local-first
Your files and your Git history.

04 Your choice of AI
Bring the model you prefer.

WHO IT'S FOR

People leaving WordPress, and anyone who wants a fast site without a CMS.
