FREE & OPEN SOURCE

subctl

An agentic coding harness for the agents you already pay for.

A master daemon for your Claude Code and Codex dev team. It spawns parallel coding agents on your healthiest subscription accounts, watches every one, and checks their claims. No API tokens, no SaaS.

01 Parallel agents
Spawn coding agents in tmux across your accounts.

02 Camera grid
Watch every pane live on a 2 Hz grid.

03 Runtime verifier
Every claim gets checked before it counts.

04 Talk to it anywhere
Dashboard, Telegram, CLI, or any MCP client.

WHO IT'S FOR
Developers running Claude Code or Codex who want a team, not a single session.

PRICING
Free
Open source (MIT)

GOOD TO KNOW
- MIT licensed, zero telemetry
