# TechMages

## White-hat tools, built for the people who defend.

The open, white-hat cybersecurity tools umbrella from Titanium Computing. Build-your-own, authorization-first tools for MSPs and security professionals, and home of the Warlock OS field cyberdeck.

**01 Warlock OS**
A field cyberdeck for on-site testing.

**02 Authorization first**
Every tool is built around permission to test.

**03 Build your own**
Open designs you can make and modify.

### WHO IT'S FOR
MSPs, pen testers, and security students.

### PRICING
**Free**
Open source
