TiinyBench

Measure what your Tiiny actually does.

An independent benchmark for the Tiiny AI Pocket Lab. Prefill scaling, sustained throughput, concurrency, and reasoning cost, measured on the device and reported in one self-contained file.

01 Measured on device
Real numbers, not spec-sheet claims.

02 Four dimensions
Prefill, throughput, concurrency, reasoning cost.

03 One file
A self-contained report you can share.

WHO IT'S FOR
Tiiny owners and anyone deciding whether to buy one.
